**Essay Title:** Integrity in my Life

## **Essay:**

Integrity, an important value for my life. This word means "do the right thing, even when nobody is seeing" and I really believe we all would practice this value.

One day, I was walking in the street and the girl in front of me left her wallet. At the same time, I called her and advised her about the wallet. She got so thankful because her wallet had a lot of money and she didn't want to lose it.

Another day, I was doing an exam and I didn't know how to answer one question. I was almost crying when I realised that a very good student was next to me and I thought "why don't I see just the answer of this question?" and I was going to do that when I remembered that it is wrong and we must not cheat. So, I decided not to see his answer and try to do the exam by myself. When I received my grade, I found out I did the right thing because I got the question right.

One time, I saw a classmate stealing a pen from the backpack of another student. Later, the stolen student was not finding the pen and got really upset because it was a present from the parents. The guilty person told a lie, saying that he saw a girl from the room stealing the pen. It was terrible, so I decided to talk to him to say the truth. In the same day, he returned the pen to the person.

All these situations are examples of integrity in life. They show that it is not hard to practice this value and everyone can do it.
